

53% of adult dogs and 55% of adult cats are overweight or obese

The right diet can help prevent, delay or treat diseases like:

• osteoarthritis in dogs

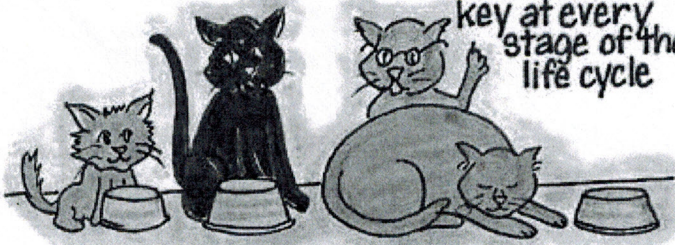

• urinary tract disease in cats

• periodontal disease in cats and dogs

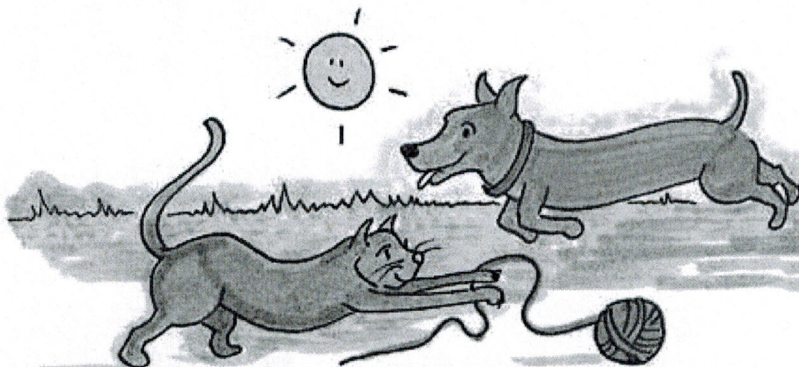

Proper Nutrition is Key to Pet Health

Proper nutrition is key at every stage of the life cycle

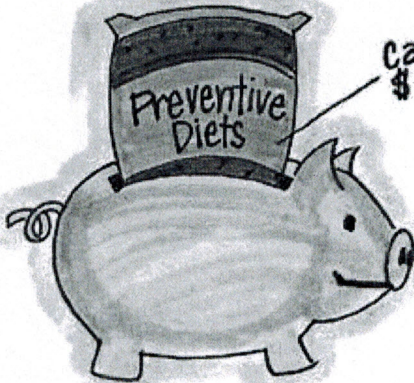

If a pet loses weight with the proper diet, it can transform the animal's relationship with its owner.

I've got my puppy back

Nutrition is a force multiplier that enhances pets' health and quality of life

can save clients \$ in the long run
